**Subject:** RE: Briefing call: Updated health advisories - PFOA and PFOS - drinking water

Cathy,

Hope you are well. I wanted to follow up on this request from May 27<sup>th</sup>.

Specifically we are looking for:

- ☐☐☐☐☐☐☐ **The list of 63 systems** where the PFOA/PFOS levels are above 70 parts per trillion.
- ☐☐☐☐☐☐☐ Any other areas where they have issued a “do not drink” advisory. I noticed this story last week:  
[http://www.al.com/news/index.ssf/2016/06/100000\\_north\\_alabama\\_customers.html](http://www.al.com/news/index.ssf/2016/06/100000_north_alabama_customers.html)
- ☐☐☐☐☐☐☐ How are private wells tested for PFOA/PFOS?

Additionally we had asked on the May 27 call for information about the communication on this health advisory between EPA and WV officials (timetable, what advice was provided, etc).

We are still waiting on this information – can you advise on when you might be able to provide us a response?

Thanks,

Mike

Cathy,

Thanks for arranging the call this morning. It was helpful to give us some context.

In addition to the information we asked for on the call (any communities in addition to Vienna where there are "do not drink" advisories and the timeline of communication between EPA Region III and WV officials), we had several additional questions I forgot to ask:

- Do you have a list of the 63 systems that tested above the 70 ppt level?
- For those systems, how have they responded (tied to the do not drink question above)? Did they all find an alternate source?
- What about private wells? Is there a testing regime for private wells in the areas that tested above?

If you could look into those points as well, it would be appreciated. We'll put those into a formal letter as well.

Have a good Memorial Day.

Mike

Hi Blake,

Thank you for sending a copy of the letter. Would it be possible to set up a call to discuss these questions? Please let me know if you have availability this week or next.

Regards,

Cathy Davis
